PROFILE SUMMARY

Master's student in Information Technology at Arizona State University graduating in 2026 with strong foundation in software engineering, backend development, and scalable system design. Experienced in building RESTful APIs and cloud based applications using Python, SQL, Docker, and AWS following Agile and SDLC practices. Proficient in data structures, object oriented programming, unit testing, and performance optimization with a focus on delivering reliable, production ready software solutions. Motivated problem solver committed to writing clean, efficient, and maintainable code.

EDUCATION

Master's in Information Technology (AI), Arizona State University	GPA: 4.0/4.0	Expected May 2026
Bachelor's in Information Technology, Gujarat Technological University	GPA: 3.16/4.0	Jul 2020 to Jul 2024

TECHNICAL SKILLS

- Languages:** Python, TypeScript, JavaScript, SQL, PL SQL, R, Bash, HTML, CSS
- Software Engineering:** Data Structures and Algorithms, Object Oriented Programming, RESTful API Design, SDLC, Agile, Unit Testing, Code Reviews
- Cloud and DevOps:** AWS EC2, S3, Lambda, Glue, Athena, CloudFormation, Docker, GitHub Actions, CI/CD
- Databases:** MySQL, PostgreSQL, MongoDB, Redshift, Snowflake, SQLAlchemy, Query Optimization, Relational Database Design
- Libraries and Tools:** Pandas, NumPy, scikit learn, Matplotlib, JSON, HTTP, Git

EXPERIENCE

ASU, Enterprise Brand Strategy and Management	Tempe, AZ, USA
Data and Editorial Analyst	Jan 2025 to Present

- Coordinate communication with cross campus teams to support structured digital publication workflows, ensuring reliable delivery, **quality assurance**, and adherence to established operational standards.
- Track engagement metrics, analyze structured datasets, and implement process improvements to enhance performance monitoring, **data accuracy**, and operational consistency.

GlassiaAI	England, UK
Software Developer Volunteer	May 2024 to Dec 2024

- Designed and deployed containerized **FastAPI** services following secure coding practices, SDLC standards, and peer review processes, **improving operational efficiency by 30%**.
- Maintained version control, executed **unit and integration testing**, and participated in structured code reviews to ensure reliable high quality and security aligned software delivery.
- Deployed Dockerized applications on **AWS EC2** with automated **CI/CD** workflows, supporting scalable secure cloud infrastructure and dependable service availability.
- Strengthened **GitHub Actions** pipelines to automate testing, monitor defects, and improve application reliability, consistency, and production stability.

NR Crew Pvt. Ltd.	Ahmedabad, India
Software Development Intern	Jan 2024 to Apr 2024

- Contributed to design and development of a full stack application using **Spring Boot**, **React**, and **MySQL** following Agile development lifecycle practices.
- Implemented structured workflows, executed comprehensive testing procedures, and resolved application defects to ensure reliable performance, security alignment, and compliance standards.
- Optimized SQL queries and improved backend efficiency by **35%** while maintaining transactional data accuracy and relational database integrity.
- Participated in sprint planning, cross functional collaboration, documentation reviews, and technical discussions to support timely milestone and feature delivery.

PROJECTS

Swiftiply, Secure AI Reply Extension	2025
- Built a browser extension using TypeScript and React integrating RESTful APIs, structured data validation, and secure configuration management for responsive reliable functionality. - Applied documentation, access control considerations, and scalable architecture principles to ensure maintainable secure deployment. - Improved runtime efficiency by optimizing data processing workflows and enhancing responsiveness for consistent application performance.	

FaceFixer, ML Powered Skincare Assistant	2025
- Curated and validated 350+ images using structured review processes to support data integrity, model reliability, and quality assurance standards. - Trained and evaluated a neural network in GPU environments, increasing mAP@50 from 62% to nearly 70% through systematic testing and performance benchmarking. - Integrated the model with backend services and relational databases, supporting scalable secure cloud deployment and monitored application performance.
